PREFACE

Appendix three, representing work done for the Sub-Committee on Research, has four major subdivisions. The first is a survey of projects funded which names projects and investigators for funded U.S. Office of Education projects during 1965 and 1966. The second major subdivision is a selected bibliography of books which lists 329 references dealing with occupational training and career guidance. Third is another selected bibliography of books giving 89 references dealing specifically with vocational and technical education. The fourth major subdivision gives articles on vocational-technical education and was prepared by Robert W. Thomas and Carolyn Taff with acknowledged assistance from 14 others who did most of the library search. These selected articles are organized into four groups, each group representing a five-year time period. Further details are given at the beginning of the major subdivisions.

ACKNOWLEDGEMENTS

For their editorial and secretarial assistance, the author[1] wishes to thank Darlene Bucholz, Ann Hull, Lois McCormick, Susan Nissen, Carolyn Taff, and Mary Rae Van Dorn.

For substantive stimulation, the author wishes to thank his fellow members on the Sub-Committee on Research: Ernest W. Anderson, Donald E. Boles, Clarence E. Bundy, Earl O. Heady, Trevor G. Howe, and Edwin C. Lewis.

---

[1] Robert W. Thomas, Associate Professor of Economics, Department of Economics, Iowa State University, Ames, Iowa; serving as: (1) Chairman, Strategic Intelligence Unit of the Project for Research and Development in Vocational and Technical Education: Non-metropolitan Areas, and (2) Chairman, the Sub-Committee on Research.

SELECTED BIBLIOGRAPHY OF ARTICLES ON VOCATIONAL-TECHNICAL EDUCATION

Robert W. Thomas
Carolyn Taff

PREFACE

This is a bibliography of journal articles for years 1945 - 1965 in the area of vocational-technical education. The articles which are included are those written in English and found in the indexes and abstracts listed on the next page. These articles were chosen for the bibliography on the basis of the following definitions of the words "vocational-technical education."

Vocational means the way someone makes his or her living. It is a job, not a hobby. Technical is defined as a specialized physical and/or mental skill which, to learn, requires less than four years after high school. This learning process may include one, two, or three year courses in a college or a university. For example, a technical institute at a university may be included. Education is defined as the teaching of these technical skills. Not included in this bibliography are articles dealing with the general philosophy of teaching. That is, there are no articles regarding where teaching fits into the social order or general pattern of world happenings.

The selected articles are grouped under four headings:

I) is a list of articles from 1961 - 1965;

II) is a list of articles from 1956 - 1960;

III) is a list of articles from 1951 - 1955; and

IV) is a list of articles from 1945 - 1950.

The work "thesis" was used to designate a Master's thesis and the word "dissertation" was used to designate a Ph. D. dissertation. Thus, "thesis" is only used when referring to a Master's degree.

The authors gratefully acknowledge the assistance of the following individuals in the bibliographic search: Sara Boys, Michel Coler, Jane Fink, William Grothus, Roger Hanson, Ann Hull, Annedale Key, Dale Mathre, Lois McCormick, Dierdre Peglar, Toni Pounds, Georgetta Seals, Ann Skogstrom, and Jerrold Soesbe.
